Thomas Bush
Software Engineer

Highly motivated and talented software engineer with over 5 years commercial experience across a broad range of products. I take genuine pride in writing clean, concise and fully tested solutions. As a self taught engineer I am passionate about mentoring as I have personally benefited massively from those who were willing to help me, thus I am always keen to help those around me.

Experience

Software Engineer
NOW TV
March 2019 - Present

Working within an angille/SCRUM team. Producing fully tested (unit, functional, regression) new features. Keen focus on code review, I am currently in the top 20 reviewers across the entirety of sky-uk. Bug fixing across multiple devices.

Front End Devloper
Brilliant Basics
May 2018 - March 2019

Worked in tandem with a number of offshore teams on a variety of greenfield projects. Played a key role in architecting and building a React Native application. Produced fully accessible angular component library.

Front End Devloper
KHWS
August 2014 - April 2018

Produced HTML emails (which has given me an appreciation for modern tech!) & animated banners. Built a number of bespoke microsites for various blue chip clients. Maintained existing large scale applications.

Receptionist
KHWS
January 2014 - August 2014

During this time I was inspired by the work of the front end team (from looking over peoples shoulders) and decided to use my free time to teach myself the fundamentals of web developmemt.
